**COMMERCIAL
MAN'S** Bull Sale

Pictures & Videos will be online at
WWW.OHLRICHS.COM & SCONLINESALES.COM

Dear Friends,

WELCOME to our 14th Annual Bull Sale. It literally seems like yesterday that we hosted our first. A lot of things have changed in the past 14 years as far as genetics, but our goals and philosophies have not. Our goals are to raise and bring to you the highest quality set of bulls that have both performance and are loaded with maternal power.

Every year we want them to be even better than they were the year before. If we would not turn any of these bulls out on cows ourselves, why would you. We use the knife pretty hard to offer you lots of quality. We are just as hard on our cows, they each one have to work better than just being average or they do not stay around. We whole heartedly believe that this is the deepest set we have offered. There is a diverse set of breeds offered with hopes that we can have something for everyone. These bulls are backed by generations of cow families in hopes that we can raise and offer you the very best.

These cattle are our life, this is all we do so we know as well as anyone how important it is to strive for the best genetics possible. Your success with a new herd sire is our success. Thanks in advance for your interest. Please do not hesitate to contact us with any questions you have. Wishing you all a prosperous, healthy and great 2021!

Wayne & Barb

******We are offering \$100 per head off of each lot if you take them home on sale day!**

Here is the Beef!!! There was not any question all fall who was going to be lot 1 for the bull sale. His pedigree alone speaks for itself. Then when you turn to the performance, this bull has it. 944# right off of the cow. That is impressive no matter what breed he is. Phenotypically, he is even more impressive yet. Study the running gear and the hip and body this bull has. He is still so smooth shouldered and clean chested. He is a unique individual. If your program is to raise bulls, females or just high quality cattle, Do Not Hesitate for a second, OHL Hombre will take you all the way.

We have a trio of these Black List bulls that are full brothers. We could not have been more please with each of them. They are easy fleshing with performance, have eye appeal and are great structured. Without any question, they will make an incredible set of replacement females. As we mentioned about lot 1, on the dam's side of the pedigree, she has been the cornerstone of our very productive Angus bloodlines. These bulls check all the boxes and are as versatile as you can make them. You get to pick which one suits your program best.

This bull has just been cool since the day he was born. Absolutely love the amount of body and the fleshing ability of this bull. He is so well balanced and smooth made. No matter what breed you raise and if you are wanting to make replacement heifers, there is no question that this one would be a heifer maker. He does not back off on performance one bit either. He checks all the boxes. Just a note, this may possibly be one of the hairiest individuals we have raised.

You could say that we have kept our Angus bulls all in the same family. The dam to this bull is the granddam to Lot 1. This cow family has been the cornerstone of our Angus genetics for many years. We were really hoping that this one was going to be a heifer to keep back in the herd. There are hardly any of these embryos left. There is no doubt that this bull is a TANK. He is packed full of meat from end to end. Easy fleshing and cool looking with plenty of performance. There is no question that we would keep every female we could out of this guy.

We have a trio of these Black List bulls that are full brothers. We could not have been more please with each of them. They are easy fleshing with performance, have eye appeal and are great structured. Without any question, they will make an incredible set of replacement females. As we mentioned about lot 1, on the dam's side of the pedigree, she has been the cornerstone of our very productive Angus bloodlines. The dam to this bull is one of our Angus donor cows. She also has a half blood Simmy in the sale sired by Pass Word, which is her natural calf. This bull is a good Meat and Potatoes type of guy. He also will go out and produce some incredible replacement heifers. He came in off of his recip mama weighing 859 pounds. That is impressive and he did not stop there, it will be fun to run him across the scale before the sale. No matter what type of cows you run, with all confidence this guy will get the job done.

There are always certain cows that we know before they start calving that they will have one that is going to be at the top of the list every year. His dam does just that as well as her two full sisters. A full sister to this bull sold for a little over \$20,000 last year. That has not been her only one. This bull will be part of our Pen of Three going to Oklahoma City. He has performance, is really good structured, well balanced and with lots of eye appeal. There is no question that with Steel Force and Saughatchee in his pedigree that the females will be keepers.

When this calf was born we knew we had one that was special. We do not do it very often, but only as a second calver we turned his dam into one of our donors. When they are made like this one, we needed to duplicate him. This bull is so cool when we put him on the move. Depth of body, stout hipped, big bodied and easy fleshing. There is no question this guy will add those extra pounds going across the scale and still maintain that extra look. He is part of our Pen of Three going to Oklahoma City.

If you are looking for lots of performance in a cool package, here you go. This guy is a mid April and weaned off at an actual weight of 702 pounds. He has a big square hip, is soft bodied, and easy fleshing with a structure that is second to none. There is no question that he will sire those really cool show heifers and high performing bulls. He will be a part of our Pen of Three going to Oklahoma City.

It is going to be fun to put the bulls across the scale again right before the sale and see how well they have gained. These two full brothers appear to be neck and neck all winter as far as gaining. Their dam is one of our top donor females and has produced several of our top sellers both bulls and females. Both of these bulls are real similar. #4227 is a little cooler made up through his front end. #0200 might be a little softer bodied. Both are square hipped and big topped and what a set of heifers they should produce ... the keepin kind. Whether you choose one or both you will not be wrong either way, just let them go to work for you.

It is not very often that we keep these bulls that are younger but this one is way too cool and good not to. This is our first crop of Super Bowl sired calves. The heifers were well received this last fall also. This bull is structurally correct and well balanced with plenty of performance for his young age. Just imagine the really cool set of baldies to run across the scale and the replacement heifers that you could keep back out of him. Reap the benefits here.

Our Stormy cow has clicked no matter how she has been mated. A full brother was one of our high sellers in the bull sale last year and a full sister just brought \$22,000 this past fall. This bull weaned off of the cow at 812 pounds. His dam will put the performance in her calves. This bull might be as long bodied of any of the bulls we have in the offering. We all know that there are extra pounds in length. Anxious to run him across the scale before the sale.

This bull is simply powerful in his total make up. 843 pounds at weaning and has not quit. Stout built with lots of body and easy fleshing. This is the first set of Focus calves on the ground this year. The heifer calves were incredible and this happened to be the only bull calf born and he is impressive. We used him again for next year and probably needed to use him even more than we did.

JSUL RIGHT TAMALE 3365

This 20/20 son has been a favorite since he was born. If Boyert would have had more time he could have been up at the show barn. Without a doubt, there is a lot of good in this bull. His mother is a first calf heifer that Cagney Effling successfully showed and is a direct daughter of Boyerts donor cow, Tammy. Born unassisted and his mother has a perfect udder. Ask Jared what he thinks of this bull, "I think a lot of this bull."

Our good friends Jack and John Stoltz raised this bull. Johnny said we have a good one here and we said bring him on. This bull is big hiped and long bodied. We read him as a bull that would work awesome on a set of angus or black baldy cows. Study his pedigree, he is bred well.

Rooster has been a pasture favorite all summer long. His dam was the past Supreme Female at the 2017 Nebraska State Fair open show and her first calf won the honors of being Supreme Female at the Nebraska 4-H show in 2019. For all good reason Doodle Bug quickly became a donor. This bull is her natural calf. Rooster is simply a truck being stout made, big hiped, and soft bodied with a cool front. With the popularity of the red cattle this bull would be an asset helping to maximize the performance on a set of red females. As for the rest of him, we will let you come to the sale and Rooster will do his own crowing, he is cool. Replacement females or pounds going across the scale ... let him work for you.

Edge was a bull campaigned by Boyert Cattle and Effling. A Broker son that was champion Simm Solution in Denver and since has been a consistent sire in production. Cattle are stout, soft made and with a lot of look. The Loaded Up x Lut dam was a past show heifer that was in the top 20 at Junior Nationals and the granddam goes back to Jake Cunningham's famous Lut cow. Mother was also a past high selling female for Boyert/Core.

Our Pass Word sired calves just continue to impress us. This bull is flawless in his structure, has extra length of body and soft made. He did what we expected of him going across the scale this fall, weigh extra pounds. He is going to be part of our pen of Simmys going to Oklahoma City. This guy is going to continue to impress us as we walk him across the scale before sale time. He has not stopped. If you are looking to make an awesome set of replacement heifers, raise bulls or feeder cattle that will perform ... this dude is an easy choice. Come to the sale and see him for yourself.

When Lucy was shown she was Supreme Female multiple times. In the pasture she is getting the same job done and even making money to pay the bills. Weaning her calf off at 895 pounds, that is getting it done. This bull is powerful in his design with a big hip and top as well as length of muscle. He is long bodied and cool to look at. You might say this bull could multitask when it comes to raising replacements or pounds or seed stock. He will pass on all these traits and they will still have extra eye appeal.

There is no question that Broker is as versatile of a simmy bull as you can use. This bull is packed full of performance and his daughters would be incredible to keep as replacements. We were actually hoping for this mating to be a heifer, we wanted to keep this one in the replacement pen ourselves. Home Brew has been a stand out since birth. Depth of body, long sided and easy fleshing is the way this bull is made. His calf crop will pay you big dividends in the fall.

Calving ease buyers step up to the auction block. There would be no reservations here to turn this bull out with replacement heifers. He is really smooth shouldered with lots of body and is easy fleshing. The Executive Order's make great cows. The heifers out of this guy would be incredible.

REMINGTON LOCK N LOAD 54U
SANDEEN LADY 930

This bull calf is a little young but by no means gives up quality or performance. He is stout hipped, big topped and cool looking. If this bull was born the first of March, there is no question that he could be one of our top picks. Just a quick note that you do not see in pictures and videos, he has two white rings on the bottom of his hind feet that do not even come above his dew claws.

SILVEIRAS STYLE 9303
JSUL RED THUNDER 9051W

This bull is a power house tank with a huge hip and extra depth of body. He is easy fleshing, to look at he is super cool and has an excellent disposition. He is out of a first calf heifer that has a pedigree second to none - Style/ Red Thunder.

This bull is truly as cool as you can make one. Not only phenotypically but also his pedigree. Yes, he is super stylish with a square hip and a big top to him with softness of middle. We like his structure and bone work as well. His dam being an Irish Whiskey/ Lut mated to Pass Word has opportunities that are endless. His dam has been a long time donor for us. Two of her embryo bulls will be in Oklahoma City with us in our Maine pen and then sell there. We have mated her several ways for both bulls and heifers and there has never been just a feeder calf out of her. A proven cow that this bull comes out of!

Again we have performance and maternal all in one package. Deep bodied and super easy fleshing. Without question this bull will help add extra pounds to your next calf crop and also leave his legacy in replacement heifers. With First Class in his pedigree you cannot go wrong.

The dam to this bull is also the dam to the lot 6 bull. This is her natural calf. We may sound like a broken record but we truly believe that you will end up with some incredible replacement females out of this bull as well as add extra performance when you take this bull home and let him help sire your next calf crop. He will most certainly sire calves with that easy fleshing ability which in turn will add you extra pounds.

Even though they are a little younger, the Flash calves have been nothing more than impressive all year, both bulls and heifers. We really could not have asked for more out of our first calf heifers that were mated to him. This bull is stout hipped and big topped and so smooth shouldered. There is no question as to whether or not this bull will go out and produce those stout made feeders and replacement heifers that are built for the long haul ... easy fleshing and longevity. Another one of those bulls we would love to keep if we had more cows.

We understand that a couple of these Flash bulls might be a little younger but when they are built like these are, you have to let them reproduce. A year ago we were as excited as we ever have been to calve out our first calf heifers and this bull is one of the reasons for it. He is really good and really cool.

This bull is a performance machine out of a first calf heifer. We would not hesitate to use him on heifers. He is good headed, extremely good shouldered and is built the way a calving ease bull should be. Along with that, he has plenty of body and is easy fleshing. Buy with confidence.

The Angus side of this pedigree goes back to our "17" cow family which has been the cornerstone of our angus breeding. This bull speaks for himself being that he is sound structured and easy fleshing. Use him for calving ease and then keep his heifers for a high quality set of replacements.

SULL KEYMURA'S CLASS 4083

When we first started out on our own 30 years ago, Chiangus bred cattle were where our hearts were and still are. We wanted this one to be a heifer because of the longevity and all the good in Chiangus cattle. His mother is getting some age to her and we were wanting a replacement for her and those genetics. You, the new buyer are going to receive the benefits from here on. He is deep, stout and has a great set of feet and legs under him. The females will make excellent cows. Disposition is great also.

If you want a burley, stout made bull with big feet and athletic moving that is easy fleshing here he is. His granddam is an incredible First Class female and also a donor cow for us. We like every aspect of this bull including his soft build and maternal abilities. With Daddy's Money being gone and then add First Class into his pedigree that in itself is worth a fair amount.

DAM: OHL CMAC BEST FRIEND 209Z (ASA 3513850 / ACA 364042)
OHL LOVER GIRL 209M

This bull is a must come and see in person. In all honesty, he was just not wanting to cooperate the way we wanted him to for pictures. Make sure you watch his video if you are not here to see him in person. The Friend cow has had a lot of incredibly good ones for us. Our top selling heifer a year ago brought \$24,000. A full sister to this bull sold for \$7,750 this fall and another one previously at \$9500. That is just a short list of what she has done. Structure on this bull is flawless, big hipped and good looking. Bonus time is his incredible hair. If you want to raise heifers that could make some high dollar breds, do not hesitate to step up and bid here. He can do it. His dam was a successfully shown female a few years ago and best yet is all the progeny she has produced.

LOT 55

Not only is this bull backed by a tremendous pedigree, but he has the look and ruggedness to back it up. The dam to 902 is also the dam to Kelton Arthur's heifer who was reserve at Charolais Junior Nationals and was also champion female in Louisville. The Outsider progeny have been very consistent cattle and are very versatile for both aspects of production. Take this bull home and let him work, you will love his daughters and he still has the ability to make you some low birth weight bulls.

This is our seventh year selling bulls on this sale and this purbred angus bull sired by Bismark could be one of the best we have ever raised. When you study his genetics, his sire needs no introduction, Bismark has been consistently siring quality cattle for a number of years and his dam goes back to VA First Round who is a Dameron First Class son. This bull is stout made, soft middled and great on his feet and legs. He combines calving ease with growth and performance to make him the total package.

DAM: HERB ROD MAN B163

This is the first Bankroll son we have raised and its easy to see why his semen is in such high demand. The overall power and muscle shape this bull offers makes him your go to choice if you need to add growth and productivity into our calves. With this bulls genetics and performance, he could raise replacement quality females and cattle that will do well in the feedyard. The simmi-angus genetics have become the proven choice for cattlemen looking to consistently raise good quality cattle every year.

Both Hereford breeders and commercial cattlemen need to take a good look at this purebred Hereford bull. We sold a full brother to this bull back in 2018 and a few full sisters to him on our online sales over the last five years. This mating is proven to consistently produce high quality bulls and heifers. You have to admire how complete and smooth made this bull is. He is big topped, level hipped and has great rib shape and body. He is big boned and footed, yet he gets out and travels freely. He will work great in both a purebred or commercial herd.

Everyone has that cow in their herd that raises a good one year after year and DOS Reba is that cow in our herd. However, after 16 years, this fall it was time to let her go. As a farewell gift, she produced this really good Loaded Up bull. I looked back in our records and we have retained every daughter of hers in our program and have sold over eight bulls which have averaged over \$6500. This bull hits you hard with his design, soft rib shape, and structural correctness. He's powerful from behind and angular upfront. You get the total package here.

SHER IZZY 642D

This Night Watch son will take the stress out of calving out heifers. He is out of a really good first calf heifer that goes back to Bismarck and with a birthweight of only 68 pounds, we feel you can use him on heifers with confidence. The bonus with this guy is you don't have to sacrifice growth and performance with your calves, as this bull is full of red meat. He is extremely sound on his feet and legs. If you're looking for a calving ease bull, take a close look at him.

 ETR MISS BARBARA X666

3763 is a predominantly Angus cow that we acquired on Griswold's annual 2018 December Female Classic. She is a physical presence and would be one of those in our herd that would jump out at you when you walk our pasture. When we considered our first opportunity to AI her, we knew that Loaded Up would be a solid option. We knew that Loaded Up would pass through a solid performance-based bull/steer pedigree along with quality maternal traits. 030H has natural muscle shape and dimension and couples it with a long spine and neck. This good looking baldy should be ready to hit the ground running this spring and should work on most any cow herd.

 GCC MISS CHIVAS 3066

I have to say this pedigree is one of my favorites. We all know that Maternal Made has become a force in producing Maine genetics. And our 5461 cow dates to the Jody 066 lineage in Griswold's G- Ranch. When 026H was born, our first reaction was to cut him and make him a killer show steer. But the more we thought about it, we knew he should be a bull. He's huge topped and sports a massive hip. He's deep sided and extremely sound. He's freaky fronted and extends nicely through a clean front third. If you're in the club calf business, here's your steer producing clean-up bull. If you're in the Maine club calf business, here's your momma making pasture bull. And if you're just looking for production value, this guy will easily meet those needs as well.

008H and 009H are brothers in the bond and have been herd standouts since birth. These ET brothers were born on back-to-back days in January and have been hard to separate since. Both walk on big feet with tree trunks for legs. They are big hipped, big topped and huge through their middle third. They are very sound and travel easily when they are on the move. Their Momma (230Z) has a strong track history of producing quality offspring. We sold her 2017 heifer calf for \$16K and her 2019 bull calf sold on this sale last year. 230Z is massive cow and these bulls should pass that production through to your herd. If you need a matched set, here you go. Imagine a pasture full of matching big bodied, bald faced beauties after these boys have run with your herd for a few years.

The 009H version of this pair of ET brothers sports a tic more frame and maybe just a bit more hip than his older brother. 008 may have just a little more middle. But in the end, we're confident you won't be able to tell the two of them apart except for 009's curly hair coat. Both bulls were born unassisted and they should produce consistent offspring. If you need one or both, these are just good cattle.

MEYER 734

Another matched set ... Y215 and Y530 are Bankroll sons out of two of our highest performing, cross-bred cows. Their Mommas are very similar in their type and kind and when we decided on Bankroll as an AI option for each, we knew that if the mating's produced bull calves, they would fit nicely in a pasture together. Y215 is probably the thicker of the two and yet Y530 offers a bit more frame. They blend power and soundness into attractive packages. We expect them to be equally as productive as they produce high performing steers or replacement heifers.
